

END-USER EXPERIENCE MANAGEMENT

TrueSight Edge

COMPLETE END-USER VISIBILITY TO AKAMAI APPLICATION PERFORMANCE SOLUTIONS

MORE COMPLETE VISIBILITY

- Real time end user view for Akamai accelerated applications
- Enhances Incident Management and Service Level Management
- Intuitive visualizations provide side-by-side comparisons

BUSINESS BENEFITS

- Quantifiable measurements of performance improvement
- Fast to implement
- Confidently guide global deployment decisions

TrueSight™ Edge enables organizations to see the benefits provided to each individual user for any web application delivered by Akamai's Application Performance Solutions (APS) without any changes to their application or infrastructure. TrueSight Edge provides accurate end-to-end transaction times, as experienced by all users. Built-in dashboards provide side-by-side comparisons of non-accelerated versus accelerated applications. Using these data-driven insights, organizations can better plan their infrastructure strategy by identifying applications that benefit from Akamai Application Performance Solutions.

OPTIMIZED FOR AKAMAI APS

TrueSight Edge is the result of joint efforts between Coradiant and Akamai. The solution was developed for mutual customers to ensure seamless integration and interoperability with applications accelerated by Akamai Application Performance Solutions, a suite of Web and IP-enabled application delivery services. Organizations leveraging the integrated solution can now see a complete and consolidated view of end-user performance critical for managing incidents, reporting on service levels and driving business decisions.

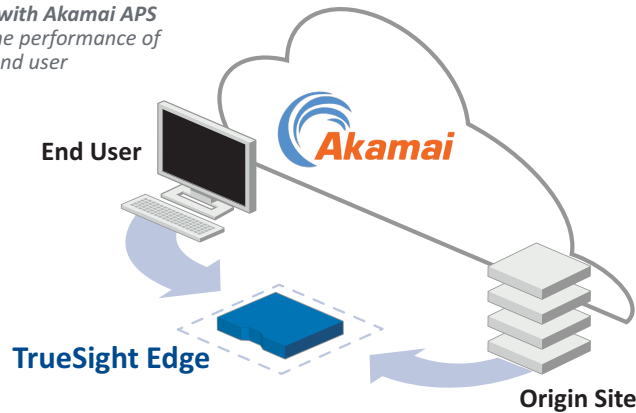

QUANTIFIABLE ACCELERATION BENEFITS

TrueSight Edge collects detailed, real-time metrics for every user visit for all customer applications. The intuitive dashboards provide views that show the results of acceleration for side by side applications, before - and after acceleration, as well as showing select users or regions. TrueSight Edge allows organizations to better plan their infrastructure strategy by identifying applications that benefit from Akamai Application Performance Solutions.

TrueSight Edge

COMPLETE END-USER VISIBILITY TO AKAMAI APPLICATION PERFORMANCE SOLUTIONS

*Deploying TrueSight Edge with Akamai APS
Get real time visibility on the performance of
your application from the end user
perspective*

COMPLETE END USER VISIBILITY FOR AKAMAI APPLICATION PERFORMANCE SOLUTIONS

Coradiant TrueSight Edge securely captures and stores all web activity in real time for all users integrating web traffic, performance, and availability metrics gathered from each user visit for applications accelerated by Akamai.

FAST DEPLOYMENT & EASY MAINTENANCE

TrueSight Edge is delivered as a new software module enabled within an existing TrueSight IM or AIM appliance. Application instrumentation can be passively deployed using Akamai Edge Akamaization services and requires no changes to the infrastructure or application code. The benefit for even complex global applications is a fast deployment with no impact to development cycles or performance and complete control over the instrumentation.

LEADING DATA SECURITY

All TrueSight Edge data is securely stored inside the data center. TrueSight Edge introduces no points of attack or failure & security officers have full control over data storage and management of SSL keys.
